## PROJECTS

- **Task management platform** <https://github.com/AtasieOana/Task-Management-Platform>
  - Web application built with MySQL, Java and Angular
  - Projects includes tasks that can be assigned to collaborators who can communicate via chat. Users can observe the tasks in a calendar and to create a board they can choose to use a template.
- **Sweetshop Online** <https://github.com/AtasieOana/Online-Shop>
  - Web application built with ASP.NET
  - A user can be unregistered, registered, collaborator or admin. The last two roles can add/edit/delete products. Registered user can place orders and leave reviews, unregistered user can only view products.
- **News App** <https://github.com/AtasieOana/Android-Project>
  - Android application built with Java
  - News are taken from an online news API. Functions such as share, local notifications and camera operation are implemented.
